

AL Version Manager README

Extension to manage versions and changelog of Microsoft Dynamics 365 Business Central AL Extensions

Features

This extension adds a section under the SCM tab on VS Code (Source Management/GIT)

AL Version Manager

- **Add Changelog Entry**: opens a prompt that adds a first entry for the version in the changelog if it doesn't exist, otherwise adds a new detail entry.
- **Increment Version**: Increments the version by the specified amount.

Enjoy!
